No. 8878 Weichang Road, Southern Lebu Village, Lebushan Ecological Economic Development Zone, Weicheng District, Weifang City, Shandong Province, China.

01 Mixed Feed Additive (Special for Cattle and Sheep)

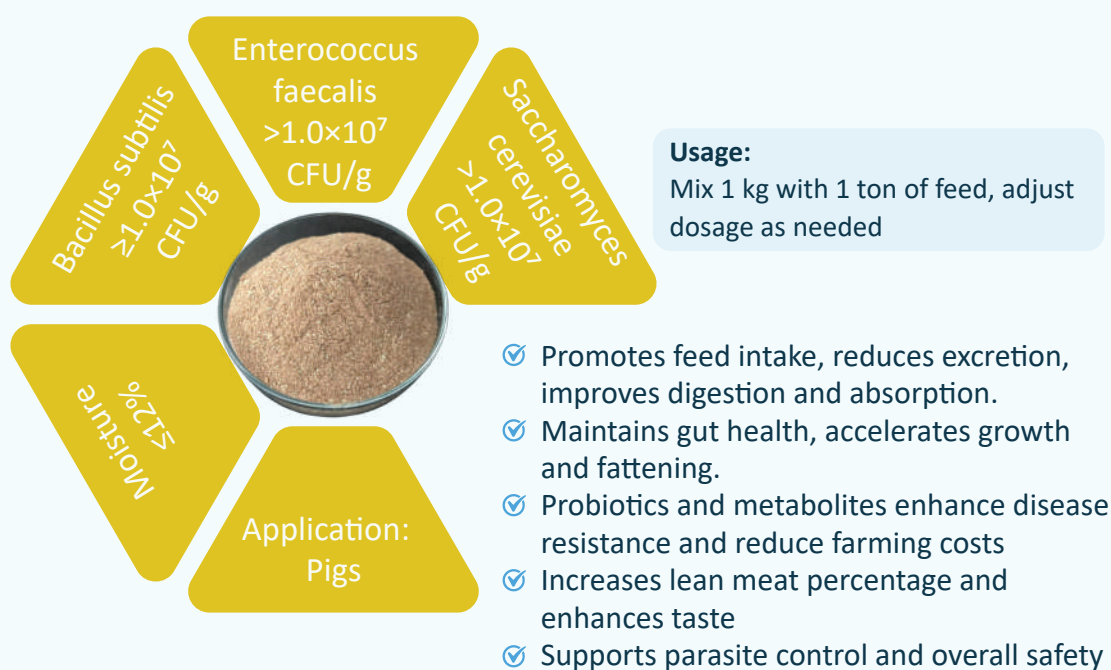

Ruminants :

Dosage: Cattle (beef/dairy): 0.5 kg/day

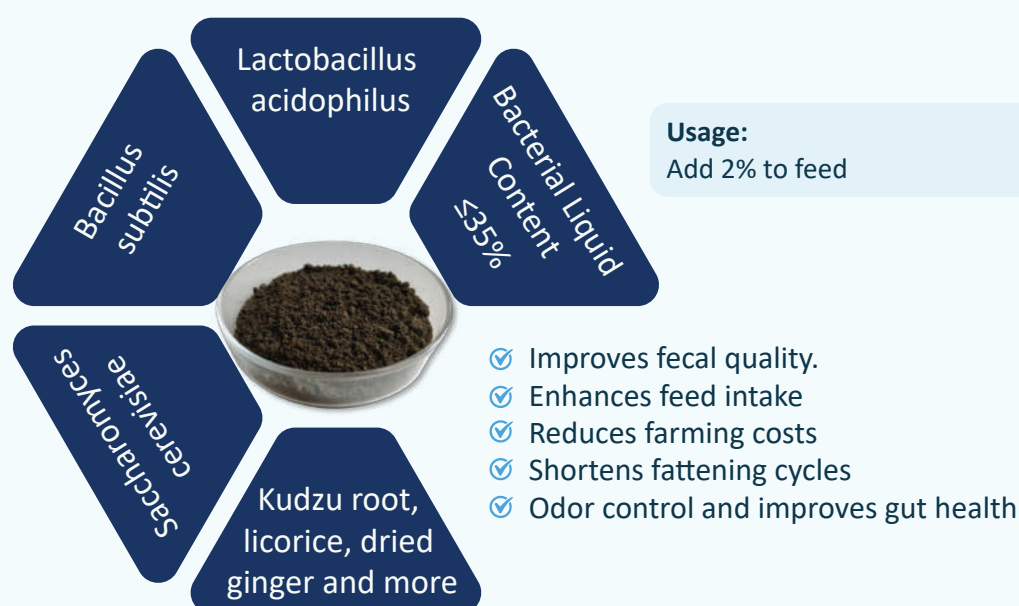

- ✓ Improves rumen environment and maintains intestinal health
- ✓ Enhances palatability and increases feed intake
- ✓ Improves feed efficiency, promotes milk production and growth
- ✓ Enhances meat and milk quality
- ✓ Degrades mycotoxins and improves farming environment

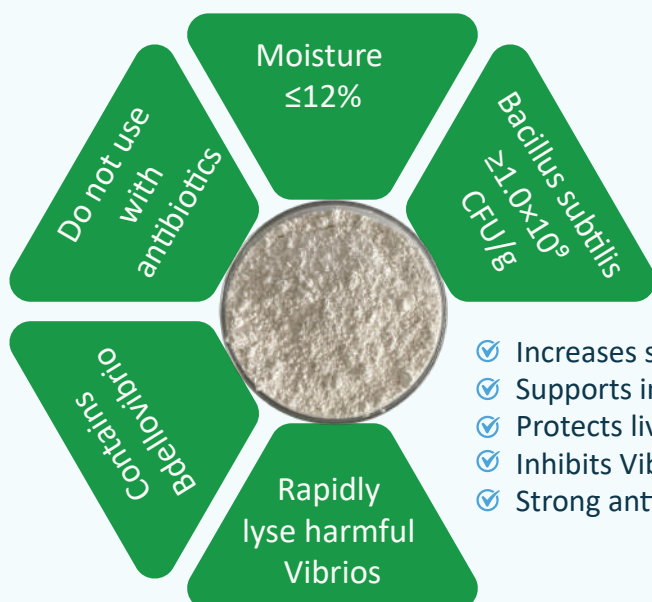

02 Mixed Feed Additive (Special for Fattening Pigs)

03 Mixed Feed Additive (Special for Pig Fermented Herbal Extract)

04 Mixed feed additive Bacillus subtilis (Special for Aquaculture) 100 g

Usage:

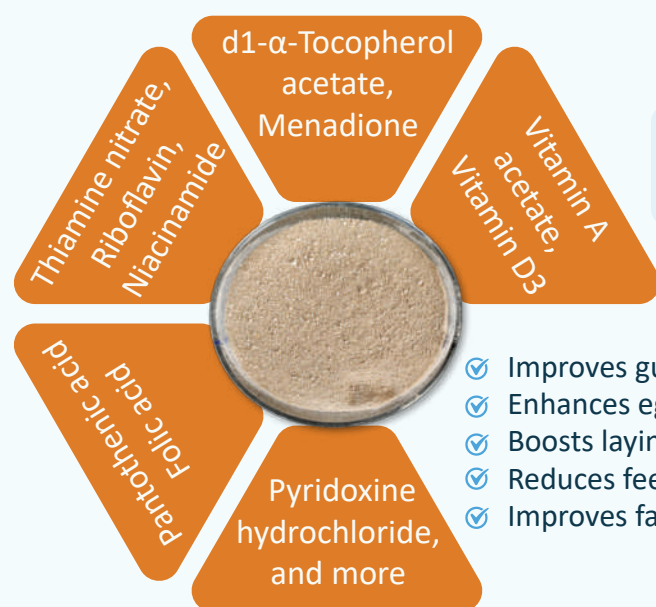

Pond application: 100g treats 2 mu

Feed mixing: 100g per 20kg feed

- ✓ Increases survival rate.
- ✓ Supports intestinal health.
- ✓ Protects liver and gallbladder.
- ✓ Inhibits Vibrio bacteria.
- ✓ Strong anti-stress response.

05 5% Compound Premix Feed for Laying Hens

Usage:

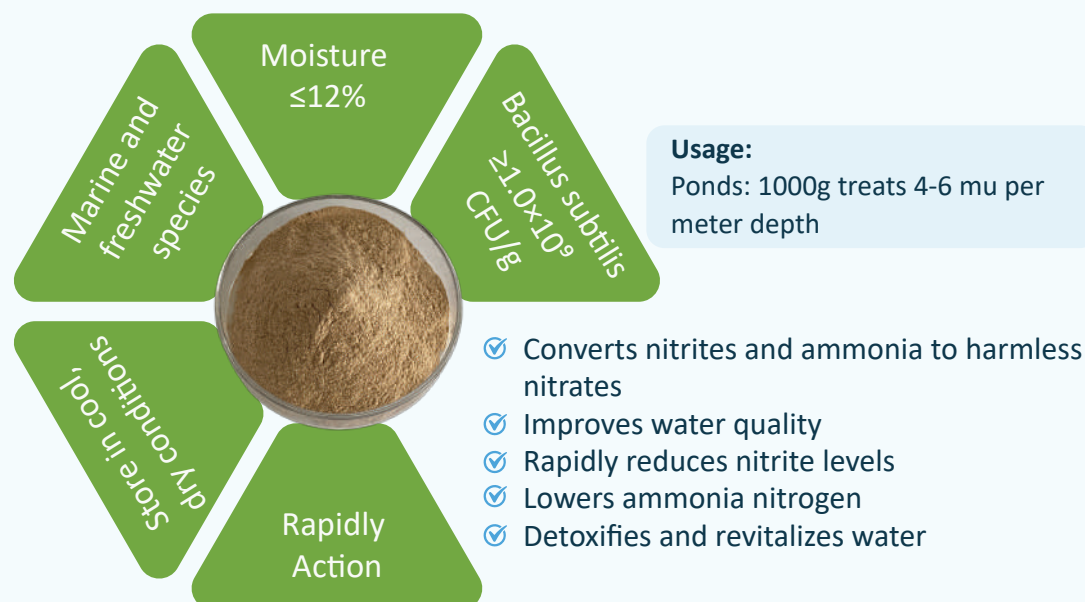

Pond application: 100g treats 2 mu

Feed mixing: 100g per 20kg feed

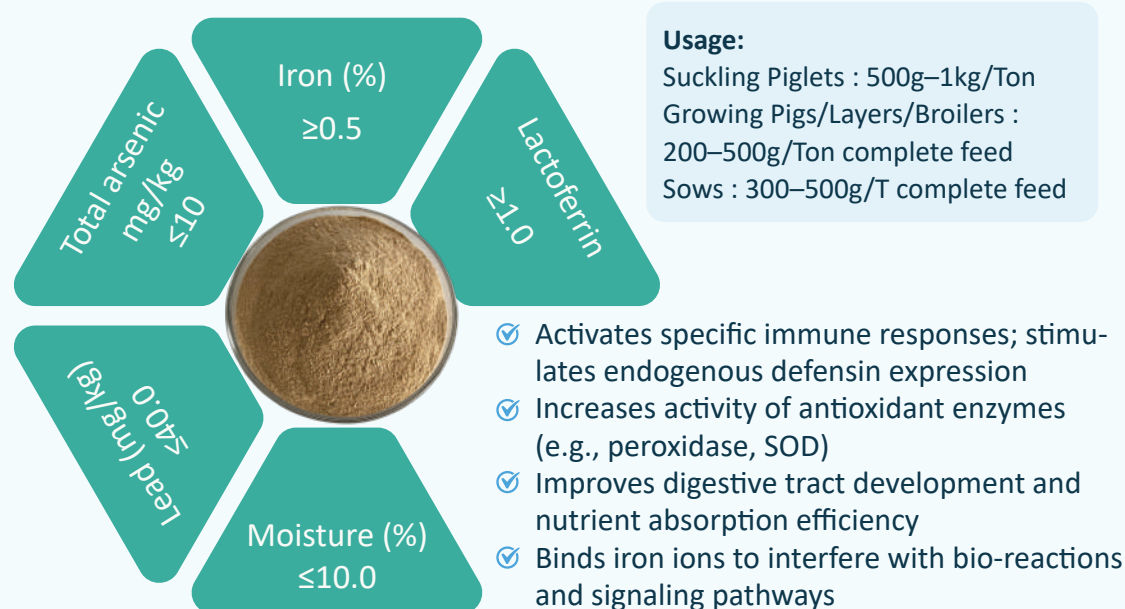

- ✓ Improves gut health and digestion
- ✓ Enhances egg quality (size, shell color/thickness)
- ✓ Boosts laying rate and extends peak production
- ✓ Reduces feed-to-egg ratio
- ✓ Improves farming environment

06 Mixed Feed additive Bacillus Subtilis (Special for Aquaculture) 1Kg

07 Mixed Feed Additive Lactoferrin (Feed Mill Special Supply)

Shandong Dayi Biotechnology Group Co., Ltd.

Shandong Dayi Biotechnology Group Co., Ltd. is a comprehensive group company centered on biotechnology and biosynthesis, focusing on three major categories of biological products and systematic solutions: microecological preparations, synthetic functional proteins, and biological raw materials. The company is equipped with cutting-edge laboratory testing equipment, intelligent automated fermentation systems, vacuum freeze-drying systems, and a -81° C strain preservation center. It provides high-quality microbial, fermentation, and extract products, and has been recognized as a “Professional, Refined, Unique, and Innovative Enterprise,” receiving multiple provincial-level honors and ISO certifications.

Under the guidance of experts and scientists such as Professor Cai Kuizheng, our strong R&D team has achieved breakthroughs in lactoferrin, yeast culture, and herbal fermentation.

The company always prioritizes research and development, continuously carrying out original research and integrating domestic and international technological resources. With a complete R&D system, strict quality control, and excellent product performance, Dayi is committed to improving animal immunity, digestion, and productivity. We have established strategic partnerships with Chinese agricultural and animal husbandry groups such as Wens, New Hope, and Zhonghui. Our products are sold both domestically and internationally, making us a trustworthy partner in the field of animal health.

Cultivating nature – we believe Dayi can bring well-being to animals.
